ZEB		Zebrawood	Africa	Moderate	No	Pale golden brown to pinkish-brown with pronounced dark brown streaks; coarse texture

**\* LEGEND:**

**Smooth:** no surface grain / inclusion(s) present in dipped finish

**Mild:** Predominantly smooth; occasional surface grain or minor inclusion in finish

**Moderate:** Consistant surface grain

**Deep:** Deep surface grain in finish

**Inclusions:** Inconsistancies in the grain; naturally occuring voids; small dark pock marks; common in burls

**Note:** Each wood species has its own individual character and can vary from piece to piece. The above is supplied as a general guideline.

**Sapwood:** The soft wood occasionally found between the inner bark of a tree and the heartwood
