Smooth: no surface grain / inclusion(s) present in dipped finish

Mild: Predominantly smooth; occasional surface grain or minor inclusion in finish

Moderate: Consistant surface grain

Deep: Deep surface grain in finish

Inclusions: Inconsistancies in the grain; naturally occuring voids; small dark pock marks; common in burls

Note: Each wood species has its own individual character and can vary from piece to piece. The above is supplied as a general guideline.

Sapwood: The soft wood occasionally found between the bark of a tree and the heartwood
